100

## Congratulations Team!

Kyra O'Brien

A successful rollout of our new PSP application required hours of preparation, input, and solutioning which would not have been made possible without our Pilot Team. Individuals were selected based on their work ethic, knowledge, and reputation as top performers, and they did not disappoint. They played a vital role in the successful implementation of our new platform and continue to support the project with testing and acting as subject matter experts for their teams. Thank you for all your hard work and dedication.
